

Instructions for setting up Amazon fire TV or Amazon fire tv Stick

Call me if you can't figure it out PLEASE
Rajeev 310-462-2604

If you like the device which most people do please go to YELP.COM and leave a positive review under Advanced Computers & Printers Lawndale CA I would greatly appreciate that.

First of all connect to wifi if you have Stick if you have fire Tv Setup Ethernet is preferred but wifi can also be used however remember sometimes Ethernet is more reliable and faster.

Second if you already have a account with amazon.com login. Otherwise register on your computer sign up new customer use email and name and create account and login. If you put a credit card on amazon account then you get the free apps on the main page like youtube and cbsnews. Most of you want to go to KODI or (SPMC/XBMC) on this box which is where you get the things for free.

So first you go to SETTINGS then APPLICATIONS, Then MANGE INSTALLED APPS, Then KODI Then click on LAUNCH APPLICATION Over Here NEVER click on Uninstall or Clear Data as that would wipe out all the work I did and I do charge \$30 to reprogram so Make sure to let everyone in your household know not to do that. VERY IMPORTANT. Force stop can be used if you ever get a black screen entering kodi hit force stop 2-3 times and then Launch Application it launches Kodi fresh.

Once inside KODI we are using a Build of Kodi Called NOLIMITS

Now go to the different Headings like Movies Tvshows Sports Live Tv Etc.

1. EXODUS is best app these days go to movies or Tv-shows then in theatres or search and you will find great moviesant tv shows in 1080P start watching and enjoy
2. PROSPORTS gives you SpOrts sometimes even in High Definition. Also checkout SPRTSDEVIL

3. Empflix, Fantasi.cc, Lubetube, Woodrocket and JizzPlanet are Adult apps and if you HAVE KIDS can be added by going to Indigo then App Installer then adult then look for apps line2 Some other apps do not work
4. Bharat Movies, Filmy By Nature, TV Desi Zone Aftershock and have Great content for Indians.
5. Filipino On Demand, Pinoy Tv, Pinoy_ako has stuff for philipinos best to go to Indigo then app installer then international apps then Filipino and Indian and install apps there
6. Navi-x is a powerful server where you can find at least 5000 tv channels Click on Navi-x Start here Most viewed 24 hours and then each line can be 100-200 channels explore
7. Castaway is a good app for watching Live Sports just click on Live Sports Atthenet.t and choose whatever you want to watch including Espn NBATV NFL Network
8. Another new app is CCloud for watching Live Television especially for foreigners go to non English International
9. ICEFILMS gives blue ray and Dvd Quality movies and Tv Shows. Also events like mtv music award show are automatically recorded and can be watched anytime in HQ.
10. Mobdro is a good one for live tv
11. Check out all apps and a lot of answers can be gotten by going to you-tube and type in your questions related to KODI 17.3

If You need International Addons Go to Tools Community Portal Add-On Portals Filter Results (By countries) then choose your country and keep installing all apps for that country

Some Filipino apps for example were hidden under Indian
